

## Are your company login credentials for sale on the dark web?

Your staff often use their corporate email credentials and passwords to sign up to third party sites and applications. More and more of these sites and apps are breached placing sensitive company data in the hands of cyber criminals. Almost half of employees admit they use the same passwords for both work and personal accounts making it easy for cyber criminals to commit widespread fraud.

Let Evaris scan the deepest, darkest areas of the dark web to find stolen credentials for your company so you can put adequate security measures in place.
